

Dear Property Owner,

Person County is installing fiber to connect the new public communication towers at Mt. Tirzah and Bushy Fork to our IT facility on Barden Street. The new fiber will improve our public safety communication system, allowing our 911 operators to communicate more clearly with first responders during an emergency.

You are receiving this notice because you own property along the fiber route. The County has contracted with UtiliPlex to construct and install the fiber. Construction should be complete by Dec. of 2018.

During construction, UtiliPlex will maintain a safe and clean construction area. UtiliPlex will also return disturbed areas back to the pre-construction condition. We appreciate your patience, as we work on this important public safety project.

If you have any questions, please contact me at state@personcounty.net or 336-330-2205.

Sincerely,

Sybil Tate
Assistant County Manager
